

Professional Development Opportunity

THE BETTER PROGRAM™

Are you interested in chronic disease prevention and screening? The BETTER Program™ Prevention Practitioner™ Training offers ongoing learning opportunities for Health Professionals working in Primary Care.

The purpose of this FREE 2-day, in-person training is to enhance the skills of the Health Professional in the area of chronic disease prevention and screening through hands-on training using role-playing, patient cases and the BETTER tools. Participants will receive 11 hours of Continuing Education credits.

REQUIREMENT: Participants must be working in a Primary Care setting or somehow linked with Primary Care.

For more information about how to register for upcoming sessions or if you are interested in holding a Prevention Practitioner training session in your area, please visit our website <http://www.better-program.ca/training> or contact Margaret Harder at margaret.harder@wchospital.ca.
