Lippincott Advisor & Procedures Information for Primary Care Networks (PCN)

What is Lippincott Advisor & Procedures?

Lippincott Advisor and Procedures is a comprehensive clinical resource that provides evidence-informed guidance at the point of care for nurses and allied health professionals. Lippincott includes a wide range of resources to support clinical practice, including:

- ✓ Clinical Procedures
- ✓ Condition and Disease Management
- ✓ Medication and Diagnostics Test Information
- ✓ Patient Education Resources

Primary Care- Specific Content

In addition to standard Lippincott content, PCA's instance contains primary care-specific resources developed by Edmonton West PCN, providing additional tools and guidance tailored to the needs of primary care teams.

Why Use Lippincott?

By providing convenient access to evidence-informed clinical guidance, care teams can:

- Access trusted clinical information at point of care to support timely decision-making
- Support onboarding and orientation of new staff with readily available clinical content
- Maintain clinical knowledge through access to up-to-date guidance
- Reduce time spent searching for clinical resources, allowing more time for patient care
